To Whom It May Concern:

### NOTICE OF FINAL HAZARDOUS WASTE FACILITY PERMIT DECISION

In accordance with the requirements of California Code of Regulations (CCR), title 22, section 66271.14, the Department of Toxic Substances Control (DTSC) is issuing this Notice of Final Hazardous Waste Facility Permit Decision (Notice) for the following facility:

Ecology Control Industries (ECI), Richmond  
255 Parr Boulevard  
Richmond, California, 94801  
Contra Costa County

ECI processes used underground fuel storage tanks. During the course of processing tanks, ECI removes oily solids and generates wash water that is contaminated with hydrocarbons. ECI stores these wastes in roll off bins, 55 gallon drums and tanks that require a permit from DTSC.

On June 5, 2006, DTSC published a public notice in the Contra Costa Times. DTSC held a 45-day public comment period from June 5, 2006 to July 20, 2006 for the Draft Permit. DTSC held a public meeting and a public hearing to receive comments on the draft Permit on July 10, 2006.

Public comments were received during the public hearing and by postal mail. DTSC has prepared a Response to Comments document and made minor changes to the Draft Permit. The Response to Comments (RTC) document, the DTSC memorandum to file listing the revisions made to the Draft Permit in response to public comments, and a marked up version of the Final Permit showing all changes from the draft to final permit, are available for formal public review at the repositories listed at the end of the Notice.

The Final Hazardous Waste Facility Permit becomes effective on April 6, 2007 unless a review is requested pursuant to the California Code of Regulations (CCR), title 22, section 66271.18. Any person who filed comments on the Draft Permit or participated in the public hearing may petition the Department to review any conditions of the permit decision. Any person who failed to file comments or failed to participate in the public

hearing on the Draft Permit may petition for administrative review only to the extent of the changes from the draft to the final permit decision. The petition shall include a statement of the reasons supporting that review, including a demonstration that any issues being raised were raised during the public comment period (including any public hearing) to the extent required by these regulations and when appropriate, a showing that the condition in question is based on:

1. A finding of fact or conclusion of law which is clearly erroneous, or
2. An exercise of discretion or an important policy consideration which the Department should, in its discretion, review.

A petition must be postmarked no later than April 2, 2007, and must be submitted to:

Watson Gin, Deputy Director  
Hazardous Waste Management Program  
Department of Toxic Substances Control  
P.O. Box 806  
Sacramento, California 95812-0806

A copy of the petition should also be sent to:

Mohinder S. Sandhu, P.E., Chief  
Standardized Permitting and Corrective Action Branch  
Department of Toxic Substances Control  
8800 Cal Center Drive  
Sacramento, California 95826

In its role as a Responsible Agency under the provisions of the California Environmental Quality Act (CEQA), DTSC has determined that the environmental documents prepared for the ECI Richmond facility adequately addressed potential impacts associated with the renewal of the Hazardous Waste Facility Permit. DTSC will file a CEQA Notice of Determination (NOD) with the State of California / Office of Planning and Research upon the effective date of the renewed permit unless an appeal is filed with DTSC prior to the effective date.

A copy of the complete administrative record for this permit decision is available for review at:

Department of Toxic Substances Control  
8800 Cal Center Drive  
Sacramento, California 95826  
Please come to the reception desk and ask to view a public notice in the file room.
